

Aiming to have Personal milestones completed by in
class milestone due dates

Milestone 1 (3/12/24)

- Goals:
- Create and connect all important user interfaces (i.e exhibits, help, Main, etc)(Bottom right of User Interface Mock-Up in github)
 - Have basic outline and set up of data base
 - Add basic images and design to show future concept of applictation
 - Send basic information to data base

MileStone 2 (4/11/24)

- Admin Login
- Admin interface (allow admin to edit interfaces on main site)
- Info dump using admin Login (easier and checks to make sure admin login works)
- Calender Link

Milestone 3 (before presentation)

- Set up all logins
- Security Testing
- Child select / profile setup
- Save profile information
- Recommended play of the day system

Benchmark 3 update:

We completed all tasks except the sending info to the data base.
We have all of our pages created and have the data base set up
we just have to actual find out how to send information properly.
because of this we are moving this to a goal in milestone 2.

after each milestone possibly consider asking
museam their opinions on what we have so far
